

To FCC,

I am very concerned about the service of Low Power FM. The role of FM translators is very important or they would not be used. Many people benefit from the use of translators and would not be able to receive valuable programming without them.

The radio station K-LOVE has a very positive and uplifting influence on our community and is greatly appreciated. So many local stations are negative, use inappropriate language and cause a bad influence on youth and adults. K-Love promotes helping each other and is enjoyed by all age groups of people. It is an encouraging force in our community. We do not need another of the same old local stations in our area. All people in our area have a wide choice of stations. K-LOVE in our area is all we have of this type with good reception. PLEASE do not take away K-LOVE. It's supporters and I ask for your help. Thank you FCC for helping us in this manner.

sincerely,

Hal Quate
